

Q5. (x, w) 未旋轉 , (x', y'): 旋轉後 $\nabla^2 f = \frac{\partial^2 f}{\partial x^2} + \frac{\partial^2 f}{\partial u^2}$ 170 x = x'cosu - y'sino ; y = x'sinu+ycoso $\frac{\partial f}{\partial x'} = \frac{\partial f}{\partial x} \frac{\partial x}{\partial x'} + \frac{\partial f}{\partial y} \frac{\partial y}{\partial y'} = \frac{\partial f}{\partial x} \cos 0 + \frac{\partial f}{\partial y} \sin 0$ $\frac{\partial^2 f}{\partial x'^2} = \frac{\partial^2 f}{\partial x^2} \cos^2 \theta + \frac{\partial}{\partial x} \left(\frac{\partial f}{\partial y} \right) \sin \theta \cos \theta + \frac{\partial}{\partial y} \left(\frac{\partial f}{\partial x} \right) \cos \theta \sin \theta + \frac{\partial^2 f}{\partial y^2} \sin^2 \theta$ the $\frac{\partial f}{\partial u'} = \frac{\partial f}{\partial x} \frac{\partial x}{\partial y'} + \frac{\partial f}{\partial y} \frac{\partial y}{\partial y'}$ = $-\frac{\partial f}{\partial x}\sin\theta + \frac{\partial f}{\partial y}\cos\theta$ 接域 $\frac{\partial f}{\partial u'^2} = \frac{\partial f}{\partial x^2} \sin \partial - \frac{\partial}{\partial x} \left(\frac{\partial f}{\partial y} \right) \cos 0 \sin \partial - \frac{\partial}{\partial y} \left(\frac{\partial f}{\partial x} \right) \sin 0 \cos 0 + \frac{\partial^2 f}{\partial y^2} \cos \delta 0$ 此時 $\frac{\partial^2 f}{\partial x^{12}} + \frac{\partial^2 f}{\partial y^2} = \frac{\partial^2 f}{\partial x^2} + \frac{\partial^2 f}{\partial y^2}$ 可能用 Laplacian operator 和旋轉無用! 掃描全能王 創建
